

Evolution of anticoagulation therapy in patients with atrial fibrillation

Saturday 30th August 2025

15:15–16:00 CEST

Madrid, Spain

Chaired by Professor Robert P. Giugliano

Location: Damascus, and livestreamed on the congress platform

Daiichi-Sankyo

We care for every heartbeat

This Satellite Symposium has been organised and funded by Daiichi Sankyo and is intended for Healthcare Professionals only.

Chair's Welcome

Dear Colleagues,

It is my pleasure to invite you to the Satellite Symposium “**Evolution of anticoagulation therapy in patients with atrial fibrillation**”, organised and funded by Daiichi Sankyo, taking place on Saturday 30th August, 15:15–16:00 CEST, at the European Society of Cardiology (ESC) Congress 2025 in Madrid, Spain.

As the global population ages, the prevalence of atrial fibrillation (AF) continues to increase, leading to AF being considered a 21st century cardiovascular disease epidemic.¹ Patients with AF have a 5-fold increased risk of stroke, emphasising the importance of stroke prevention, such as anticoagulation, in these patients.¹ In this session, we will review how far the anticoagulation landscape has come – from vitamin K antagonists to direct oral anticoagulants – and how much further it must go to address the challenge of AF.² The session will explore how real-world studies complement results from randomised clinical trials, drawing upon extensive data collected from the ETNA-AF registry. We will consider how anticoagulation needs vary across borders, particularly between Western and Asian populations.^{3,4} There will also be an emphasis on the importance of personalised anticoagulation strategies and how these may change over the lifetime of a patient.⁵ The session will conclude with a panel discussion and Q&A, where you will have the opportunity to engage with our global panel of experts.

We hope this session will provide you with in-depth, global insights into the evolving anticoagulation landscape, to help optimise outcomes in your patients with AF.

Agenda

- 15:15 Welcome and introduction**
Professor Robert P. Giugliano (The United States)
- 15:20 Evolution of anticoagulation in patients with atrial fibrillation**
Professor Elena Arbelo (Spain)
- 15:30 Exploring how real-world data complement results from RCTs**
Professor Renate B. Schnabel (Germany)
- 15:40 Tailoring atrial fibrillation anticoagulation strategies across borders and lifetimes**
Doctor Shinya Suzuki (Japan)
- 15:50 Panel discussion and Q&A**
All speakers

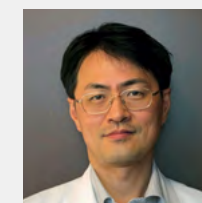

Professor
Robert P.
Giugliano

Professor
Elena Arbelo

Professor
Renate B.
Schnabel

Doctor
Shinya Suzuki
